Experience

Inspired Online Schools

Remote

Front End Developer

January 2025 – Present

At Inspired Online Schools I am working on the development of various web applications to provide students, parents and teachers with a simple and reactive platform to manage their education.

Some key projects include the creation of a student and parent hub built for the US market. I built the user interface for both of these platforms integrating with REST API's and the microsoft authentication systems to connect with Dynamics and display all the information needed in a clean user friendly way.

Skills Used

- Front-End Development with ReactJS and Typescript
- UI Design with Material-UI
- REST API Integration
- Management of Azure DevOps Pipelines

AutoProtect

Remote

Front End Developer

May 2022 – July 2024

At Autoprotect I was tasked with the development of a user friendly and modern webapp built using ReactJS and Redux. My tasks included the development of business logic using React and integrating with REST API's and creating a clean and user friendly UI using a mix of Material-UI and custom CSS. I also played a key role in managing pipelines and deployments for production releases.

Skills Used

- Front-End Development with ReactJS
- State Management with Redux
- Management of Gitlab Pipelines
- UI Design with Material-UI

MI-Voice

Southampton

Software Developer

November 2021 – May 2022

My role at MI-Voice was to help improve and modernise their voting platform. The platform is built in 3 sections that each involved different skills. My tasks involved the use of multiple systems including a REST API built in C# and .NET Core and a CMS using Sanity that was used to create NextJS sites that used ReactJS components that provided a modern and responsive feel to the end user.

Skills Used

- Front-End Development with ReactJS
- Back-End Development with C#
- Database interaction with EntityFramework
- CMS Development using Sanity

Dootrix

Wickham

Software Developer

August 2021 – October 2021

Use of ReactJS and C# on a variety of different projects to help build modern and intuitive applications. Dootrix is a software development house that built applications for a variety of customers so in this role I worked on multiple projects which offered unique functionality.

Skills Used

- Front-End Development with ReactJS
- Back-End Development with C#
- Mobile Development with Xamarin
- Cloud Integration with Azure

North Sails

Gosport

Software Developer

October 2020 – August 2021

Use of ReactJS and C# to build a more modern and user friendly experience for internal sales and task management software. This was part of an upgrade from an old VB system to use modern technologies making the overall system not only faster and more responsive but also simpler to use.

Skills Used

- Front-End Development with ReactJS
- Back-End Development with C# and VB
- Database interaction with SQL Server and Transact-SQL

toob

Cosham

Application Systems Specialist

May 2019 – July 2020

This role evolved over time and covered a wide range of tasks but was mainly focused around integrating different systems to work with a central software platform.

My main achievement while working at toob was the initial setup of an ACS system and integration of the ACS API into the core network management software allowing the remote management of CPE giving the support staff the ability to setup, manage and diagnose issues for customers all in one location.

Skills Used

- Front-End Development with Javascript and HTML5
- Back-End Development with C#
- Server Management on Both Linux and Windows Server

Experience

SupplyPoint

Portchester

Junior Software Developer

September 2017 – May 2019

At SupplyPoint I worked on 2 main projects. The first project was the development of a REST API to enable the sharing of information from a central system to other smaller pieces of software allowing for a central store of information.

The second project was the development of the UI for industrial vending machines using ReactJS. This development was to replace an outdated UI in order to give customers more power over the appearance of their machines

Skills Used

- REST API Development in C# and .NET Core
- Transact SQL and Stored Procedures
- Desktop Development with Electron
- Front-End Development with ReactJS

AST Systems

Eastleigh

Software Tester

June 2016 – September 2017

This role was part of my apprenticeship and involved a variety of tasks to aid my learning. My primary role in the company was to test the software being developed and to create automated tests to help ensure the software is tested consistently.

Alongside my role as the tester I also helped to maintain the windows servers used for testing and development and the databases for each system to ensure that all the servers were running the same versions and had the same data.

Skills Used

- Automating tests with Selenium and Python
- Creating Unit tests in C# with .NET
- Maintaining Databases with SQL Server and Transact-SQL

Education

Ripple Rock

2017

Agile Training

A 2 week intensive course in the implementation of Agile and Scrum
